Page V

The balance of power

There is a new balance of power in container line shipping as the new multi-national, multi-trade alliances swing into action.

Page VI

World container port traffic league

A statistical analysis of container traffic over ports worldwide, comparing their performance of 1994 with 1993, and ranking ports and countries by total TEU throughput.

Page XI

Up, up and away...

A detailed analysis of the world's containership fleet in service and newbuildings on order, by vessel type, size and nationality of beneficial owner.

Page XIII

Slower growth and fewer players for US intermodal

Following a year of stagnant volumes in 1995, 1996 will see limited growth in the US intermodal market, but mergers and consolidation between railroads will lead to the creation of much larger operators.

Page XIV

Soul-searching for intermodal Europe

In the European combined transport freight market, the push for rail liberalisation by the European Commission has not yet produced the required change in business practices.

Page XV

A new box-building high

Worldwide container production hit a new record in 1995, when it topped 1,200,000TEU, but is likely to be down in 1996.

Page XVI

Quay crane build-up

A record delivery of 250 ship-to-shore gantry cranes are being made to containerports worldwide during 1995-96.

Page XIX

Lessors gain ground

Leasing companies enjoyed a good run of business in 1994-1995, although the outlook is less certain for 1996.
